

American Solutions for Business Promotes Nate Disrud to Director of Technology

American Solutions for Business announced that Nate Disrud has been promoted to Director of Technology.

“Nate and I started at ASB on the same day in 2012,” explains Mike Pfeiffer, ASB’s VP of Technology. “Since that time, Nate has been promoted four times in nine years, while I remain in the same position I was hired. Nate is an outstanding leader with fantastic technical capabilities. He is a dedicated team member who contributes daily to ASB’s success.”

He will lead the Technical & Security Operations teams, providing industry-leading service levels while leveraging ASB’s IT vendors to provide proven solutions while protecting the organization’s financial interests.

Disrud adds, “I look forward to continuing to provide solutions for ASB that will benefit from both a technical and financial standpoint. Post-pandemic operations look quite different, but our goals of security and dependability remain constant.”
